JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

During the week no cases of yellow fever were reported either in Habana or the interior of the island.

On June 12, 1907, the immigration camp at Tricornia was opened for the reception of nonimmune passengers desiring to proceed to Southern States of the United States. A special report will be forwarded regarding this camp and the method of operating it.

The sanitary condition of Habana remains fair.

Report from Matanzas—Inspection and fumigation of vessels—Precautions against arrivals from Trinidad.

Acting Assistant Surgeon Nuñez reports, June 17:

Week ended June 15, 1907. Bills of health issued to 7 vessels leaving for ports in the United States. The Spanish steamship *Puerto Rico*, bound for New Orleans direct with a crew of 51 and no passengers, was fumigated June 12 when about to leave for her port of destination. No sickness on board. There were issued during the week 2 health and acclimation certificates and 2 of protection from smallpox to passengers destined for New York by way of Habana.

In view of the presence of plague in the island of Trinidad, as telegraphed to this office by Passed Assistant Surgeon Stansfield, every precaution will be taken with vessels from that island touching at this port on their way to the United States. I am informed that quarantine restrictions will also be enforced against such vessels while in port by the Cuban authorities by order of the secretary of finance.

Report from Santiago—Inspection of vessels.

Acting Assistant Surgeon Wilson reports, June 15, as follows:

Week ended June 8, 1907. Bills of health issued to 6 vessels bound for the United States. One vessel, the steamship *Ramon de Larrinaga*, fumigated prior to departure for Pensacola.

No quarantinable disease reported.

GUATEMALA.

Report from Puerto Barrios—Inspection of vessels—Mortality at Guayan and Zacapa.

Acting Assistant Surgeon Wailes reports as follows: Week ended June 11, 1907. Present officially estimated population, 250; general sanitary condition of this port and the surrounding country during the week not good.

Much fever and several deaths occur daily in Zacapa, but are not recognized as yellow fever by local authorities.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
